PROJECTS

Betterspace — *Mobile banking application*

Mashreq is a mental health platform. It enables staff to choose the wellbeing benefits that work for them.

It consisted of two applications, one for web and one for mobile. The applications were built using ReactJS and React Native as a frontend framework and I was responsible for creating layouts and functionalities on the frontend side. I was also responsible for debugging and testing existing functionalities.

Website link: <https://www.betterspace.uk/>

Mashreq — *Mobile banking application*

Mashreq is a bank in UAE, which has developed two mobile applications

The applications were built using AngularJS as a frontend framework and I was responsible for creating layouts and functionalities on the frontend side. I was also responsible for getting data from the backend in JSON and displaying them in the frontend.

Tamreen — *Learning platform website*

Tamreen is a learning platform that offers teaching resources inspired by the 2022 FIFA World Cup Qatar.

This project is developed using the Symfony framework. I was responsible for building the front part from the beginning and maintaining it for other developments and bug fixes.

Website link: <http://tamreen.qa>

Landmark — *Business portfolio website*

Web based application for advertising agency. This website offers the ability to manage projects and content for different pages.

This project is developed using Wordpress as a content management system and BarbaJS for AJAX calls, giving the idea as a single page application.

Website link: <http://landmark.al>

Bukinist — *E-commerce website*

Web based application for selling online.

The project is developed using Prestashop as a content management system and Bootstrap as a front end framework. The theme used in this website is developed and created from scratch.

Website link: <http://bukinist.al>

Arild Sela — *Portfolio website*

Web based application for showcase of my projects.

The project is developed using Wordpress as a content management system. The theme used for this project is created from scratch.
